

GENERAL NOTES

[1] This drawing is the copyright of the architect. [2] The contractor is to check and verify the sufficiency of information, levels and dimensions on the drawing before commencing work. [3] Any omissions, discrepancies or errors are to be reported to the architect immediately. [4] Dimensions are not to be scaled from drawing. [5] Should the contractor proceed without the above approval, he does so entirely at his own risk. [6] All materials and building works are to be fixed, applied and carried out in accordance with the SABS 9400 national building regulations, local bylaws and manufacturers' specifications. [7] Each contractor and material supplier is assumed to be experts in their field and is responsible for the product produced by them. Should they believe that site conditions or the use of their product are not conducive to the production of an acceptable product, they are to report same. [8] E.L.s to be at changes in direction on all plumbing pipes. [9] R.E.L.s to drains to be installed every 20 meters and at the head of every sewer run. [10] Min. Fall for 100mm drains 1:60, and min. Fall for 150mm pipes, 1:250. [11] No backfilling to take place prior to inspection and approval from the relevant consultants and inspectors. [12] All glazing to be in accordance with part IV of the national building regulations. [13] Where demarcated, specialist shop drawings are required, and are to be approved prior to manufacture and installation. [14] All brickwork to be in accordance with the NHBRC building manuals as well as in accordance with the details and the general notes on the engineer's drawings. [15] All dimensions to be checked/measured on site prior to manufacture.
